WORK EXPERIENCE

Blue Cross Blue Shield of Michigan

05/2019 – 08/2019, 01/2020 - Current

Business Application Developer

Detroit, MI

- Worked in Angular, C# and SQL to create/update/maintain multiple websites for the Underwriting team
- Websites worked on replaced 15+ year old software and increased productivity by up to 50%
 - Old applications were being used in command prompt and didn't allow for edits
- Worked to validate data given to us, solve issues users had, and create new websites/data tables

DTE Energy

02/2019 – 05/2019, 09/2019 – 12/2019

Business Application Intern

Belleville, MI

- Worked in SQL and Python to find missing revenue, optimized searches for tables with 2 million+ rows
 - Revenue included unbilled traffic signals, street lights, outdoor protective lights, etc
- Added about \$70,000 in annual revenue that DTE was not billing for from before

Epitec

06/2018 – 08/2018

Software Engineer Intern

Southfield, MI

- Worked in Angular C#, and sql to update existing web applications and add features to speed up staffing process
- Used Scrum to keep track of assignment progress and organize assignments
