WORK EXPERIENCE

Blue Cross Blue Shield of Michigan   **05/2019 – 08/2019, 01/2020 - Current**

Business Application Developer   *Detroit, MI*

- Worked in Angular, C#, .NET, and SQL to create/update/maintain multiple websites for the Underwriting team
- Websites worked on replaced 15+ year old software and increased productivity by up to 50%
    - Old applications were being used in command prompt and didn't allow for edits
- Worked to validate data, solve issues users had, create new web pages and data tables for easy data processing and organization, and worked on both front and back end integration

DTE Energy   **02/2019 – 05/2019, 09/2019 – 12/2019**

Business Application Intern   *Belleville, MI*

- Worked in SQL and Python to find missing revenue, optimized searches for tables with 2 million+ rows
    - Revenue included unbilled traffic signals, street lights, outdoor protective lights, etc
- Found and updated system to include about $70,000 in annual revenue that DTE was not billing for before

Epitec   **06/2018 – 08/2018**

Software Engineer Intern   *Southfield, MI*

- Worked in Angular, C#, .NET, and SQL to update existing web applications and add features to speed up staffing process
- Used Scrum to keep track of assignment progress and organize assignments

---
